

Pre-requisites required for entrance to the program are not shown.

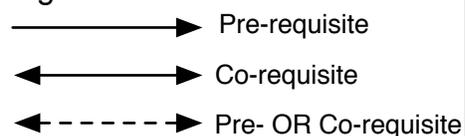

CHEM 2232 & 2234 and BIOL 1101&L are also required for the BS/MS program. Students who have not completed them before admission to the program MUST consult with their advisor or the department chair on a suitable schedule for completion of these courses.

Classes with a \* are recommended rather than required.

A total of 8 credits of Chem 4485 and 10 credits of Chem 6635 is required.

A total of 20 credits at the 6600 level is required.

#### Legend

Chem 4407 is taught ALTERNATE springs.

# Chem 4407 is a prerequisite for 6609 but both are typically taught during the spring semester so BS/MS students are allowed to take the two simultaneously if necessary.
